

Empowering Global Citizens: Our Vision for Tomorrow

Why Global Citizenship Matters:

3. Critical Thinking and Problem-Solving: Global citizenship education encourages critical thinking skills. Our students will learn to analyse global issues, consider various viewpoints, and develop informed opinions, preparing them to address complex challenges in their future endeavours.

- a) **Model United Nations (MUN)** Among the hundreds of thousands of students worldwide participating every year in MUN, you can find SJC Y13 students learning more about the principles of the UN and how it functions. Many of today's leaders in law, government, business and the arts participated in MUN as students.

The United Nations supports Model UN simulations by building and maintaining strong links between the UN and Model UN participants. It does this by sharing first-hand knowledge about the work of the UN at Model UN conferences; providing guidance with organizers to create accurate and authentic simulations; and encouraging Model UN clubs to take concrete action to support UN values and the [Sustainable Development Goals](#) (SDGs).

“I enjoyed debating with different people on a wide range of topics, following alliances with people along the way. It also helped me a lot with public speaking. I learned about the effects of psychoactive drugs on each individual nation and how to write a UN resolution”
